

CASE STUDY

Credit Suisse Offices, Folgate St, London

Product installed: 50m2 of JCW Silent Stone

JCW Acoustic Supplies installed 69 no. of our Silent Stone to the roof top of the new office for Credit Suisse.

Corley Woolley contacted JCW to help with the Credit Suisse project at Folgate St, London when a noise problem was recognised which was being generated by the air conditioning units on the roof top. The specification was a problem with external noise so JCW advised to use the Silent Stone using a 30mm air gap on a batten system with the Silent Stone fixed to the batten to build an enclosure surrounding the air conditioning units.

The panels measured 1200mm x 600mm x 30mm and had a standard finish (other colours are available).

The noise was absorbed and everybody was happy with the results and the finished product.
