

FEBRUARY 2026

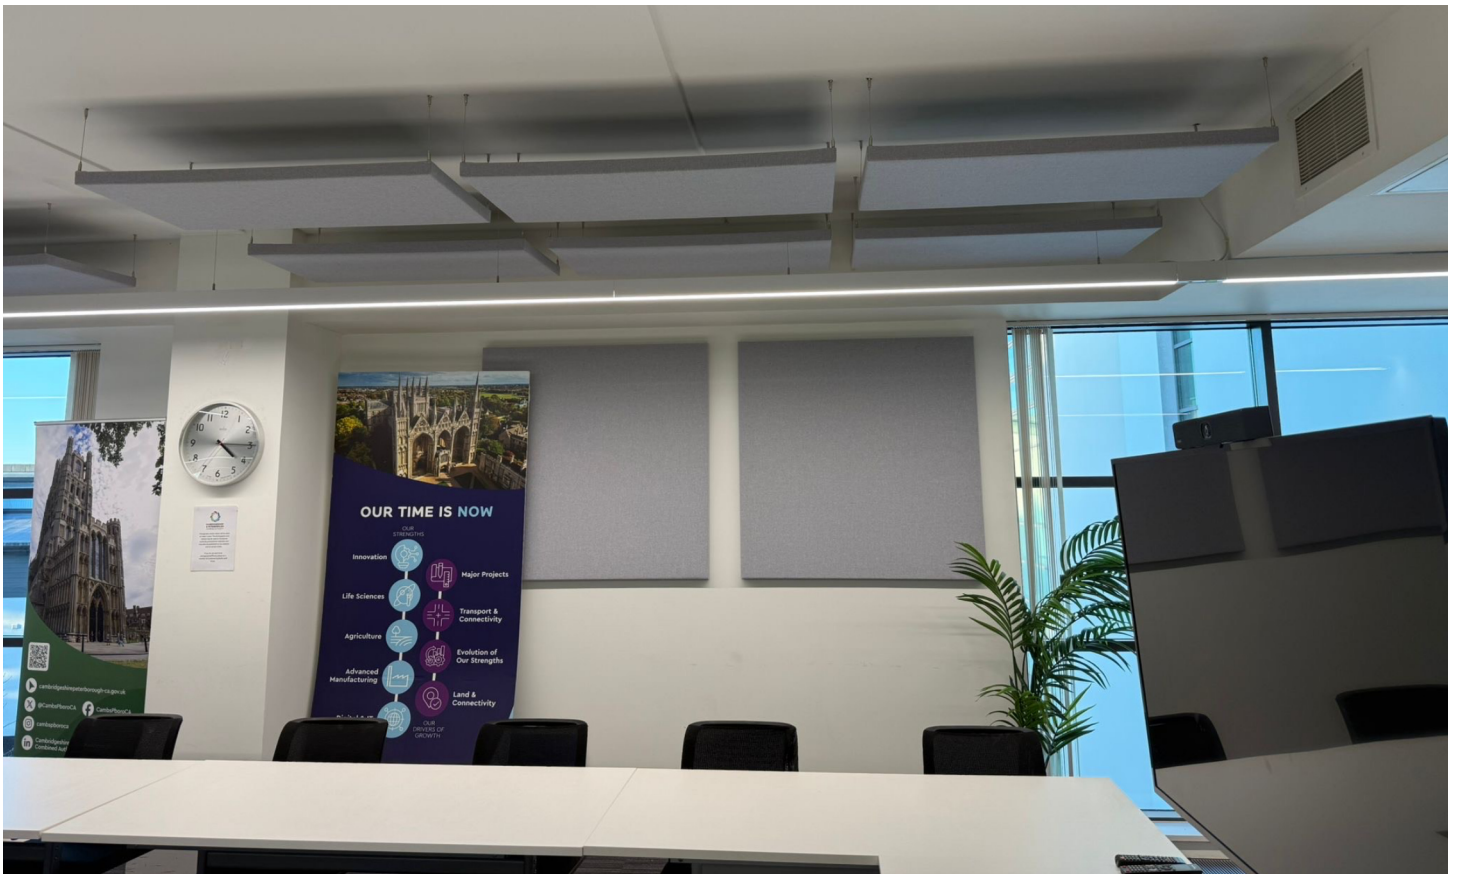

Cambridgeshire & Peterborough Combined Authority

BACKGROUND

JCW Was contacted by Cambridgeshire and Peterborough Combined Authority on the back of an acoustic report being carried out by an independent Sound engineer, the outcome of the report stated a panel QTY and design that needed to be followed closely.

WHAT WAS NEEDED

To address this, we identified the need for an effective acoustic treatment that could be integrated into their existing meeting room layout. We arranged a site visit to take measurements and to take details of the materials of the walls and ceilings.

FEBRUARY 2026

WHAT WE DID

JCW received a copy of the report and worked alongside the client to ensure the install was completed to the design and required panel specification/colour and location.

Final solution:

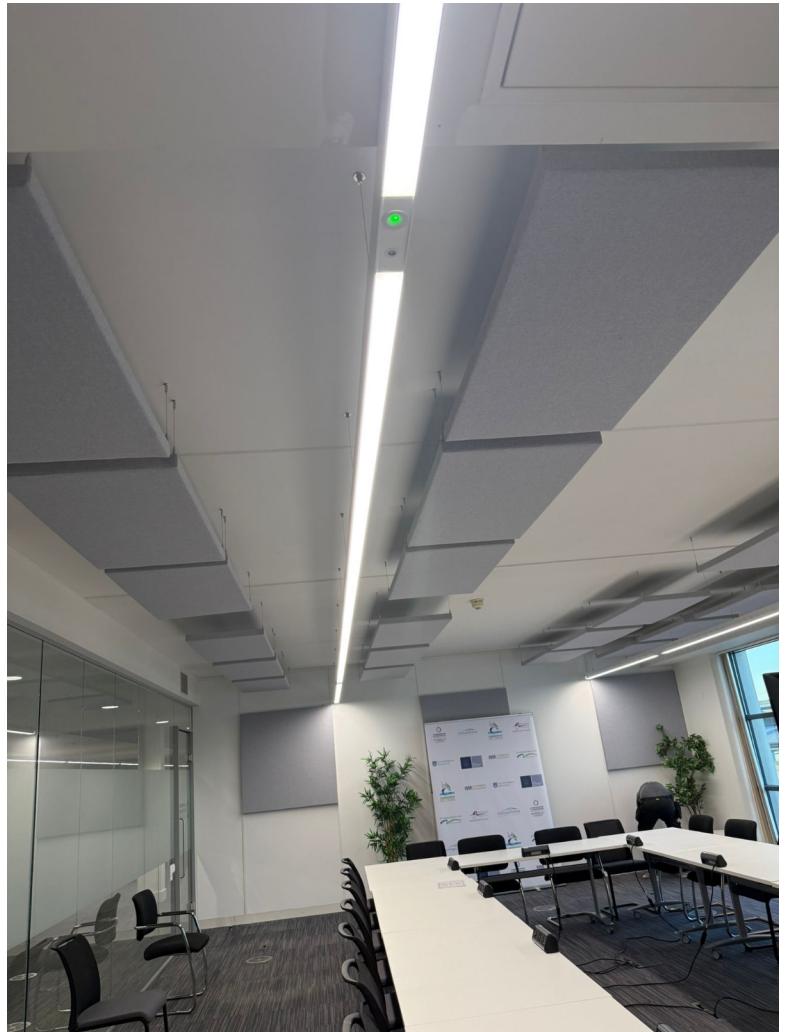

Installation of 24 Ceiling Baffles 1200 x 600

Installation of 5 Wall panels 1200 x 1200

Value - £4800.00

Location - Meeting Room

Total of 25m² of a Class A Absorbing Panel

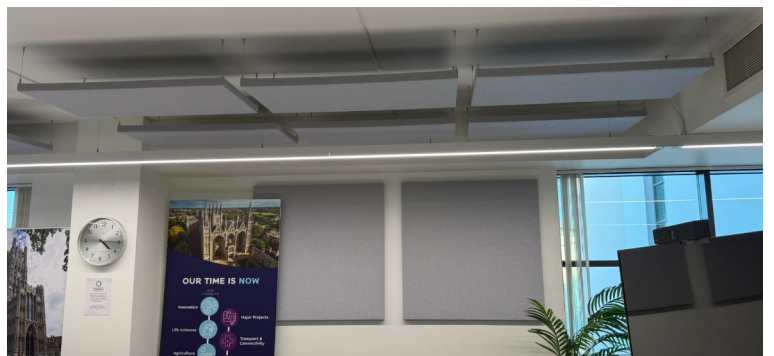

THE RESULT

Once the install was completed the project was signed off to the client's satisfaction and the below comments were made upon a satisfaction follow-up email from the office.

Comments from Customer:

"Yes, all looking good and the installers were great. Have yet to test the room using our streaming equipment but even normal conversation you could tell a difference."
